{S} Saltworks

Saltworks is an **application security consulting company.** We partner with organizations to build and mature world-class AppSec programs from Policy to Production.

Our Approach:

Saltworks helps enterprises weave security into the way they develop and deploy applications.

We build security...

• **That won't slow you down.**

• **Tailored to fit your needs.**

• **Using industry-leading solutions.**

How a Managed AppSec Program Works:

Design
We collaborate with you and your team to design a **customized security plan** for your enterprise's unique needs.

Implement
We bring our **expert knowledge and experience** and help to implement effective Application Security across your organization's development groups.

Manage
We work hand-in-hand with your enterprise to manage your security program and ensure that your **AppSec needs and goals** are being met.

Measure
We partner with your team to measure the success of your security program, leveraging **real-time metrics** to show continuous improvement in the security and efficiency of your applications.
