Google Cloud

Orasi DevOps Services:
Google Cloud Partner

Partnership that Drives Performance

Orasi is a DevOps expert, powering the acceleration, security, and adoption of software applications through automation. By building a repeatable process for creating infrastructure for application pipelines, as well as providing cost and resource savings once the deployment and tests have been completed, we ensure confidence in the customer DevOps Journey. As a Google Cloud Partner, Orasi has the certified experience to successfully deliver Google Cloud solutions to our customers and to offer expert guidance, services, and tools to accelerate delivery of quality, secure applications that drive business results.

Partners You Can Trust

Orasi, as a Google Cloud Partner, has certified teams, earned expertise, and achieved specialization with the Google-validated skills to help you leverage large-scale, multi-cloud infrastructures.

Our Google certifications include:

- Associate Cloud Engineer Certification
- Google Cloud Sales Credentials
- Professional Cloud Architect Certification
- Professional Cloud DevOps Engineer Certification

Better Together: Orasi and Google Cloud

Google Cloud accelerates every organization's ability to digitally transform its business. Google Cloud delivers enterprise-grade solutions that leverage Google's cutting-edge technology — all on the cleanest cloud in the industry. Customers in more than 200 countries and territories turn to Google Cloud as their trusted partner to enable growth and solve their most critical business problems.

Orasi's dedicated consultants provide industry-leading insights into elite continuous delivery solutions, as well as leadership, coaching, and expertise to help customers optimize their investment in Google Cloud solutions.

SOLUTIONS

Why Orasi?

Orasi implements and provides managed service DevOps solutions that drive faster, more predictable, and continuous delivery, all while improving quality. Our dedicated team of Advanced Technology consultants have earned Google Cloud Provider (GCP) certifications and have:

- Extensive knowledge of deployment and maintenance of Google Cloud solutions in customer environments.

- Deep expertise in the design and architecture of GCP solutions for organizations migrating from on-premise data centers to the cloud.

- Experience with the design and architecture of Infrastructure as Code solutions to create ephemeral environments that are integrated into CI/CD pipelines.

Orasi in Action

Client Success: Orasi Implements DevOps Solution to Deliver GCP Cloud Environments for Global FinTech Company

Recently, the Orasi team partnered with a global FinTech company to re-deploy key applications from on-prem to a multi-cloud solution. The company was struggling with heavy siloed processes, leveraging tools effectively, and obtaining repeatable standards. By partnering with Orasi, the company achieved fully automated multiple application deployment pipelines from sandbox to production using a custom-parameterized design.

As a result, the company architected the CI automation, created the on-demand provisioning of infrastructure, and built deployment automation to deliver GCP cloud environments in a repeatable, consistent, managed manner. This allowed multiple applications to reuse key components of Orasi's solution, creating standardization, improving quality, and lowering cost.

Google Cloud – together with Orasi's strategic planning, implementation, and support services – puts best-in-class cloud automation in the hands of customers.

The Orasi Difference

Orasi is a DevSecOps innovator enabling the acceleration, delivery, and adoption of software applications and cloud infrastructure through automation. Orasi's services and solutions offer full lifecycle support and integration to ensure quality, security, and scalability of transformative applications.
