

Orasi Hosting:

Fully Managed Hosting With Dedicated Environments, Enterprise-Level Scalability, and Advanced Security Offer Flexibility, Peak Performance, and Experienced Support

Managed Hosting: Take the Load Off

Lack of proper technology can increase the risk of software failure, particularly in a fast-paced continuous delivery cycle. Servers are expensive and costly to maintain. Add the complexity of networking and the costs quickly rise. In addition, not having dedicated resources to maintain servers and technology can run the risk of putting too much demand on IT resources that have other priorities.

Orasi Hosting

Orasi offers fully managed, secure cloud-based hosting that gives enterprises control and flexibility to manage applications in the cloud. Secure, managed cloud hosting enables organizations to offload hosting and management of development and testing applications, freeing internal IT resources for mission-critical application management. In addition, it reduces investment in server hardware and maintenance and provides a dedicated team to manage those applications.

Benefits of Orasi Hosting:

- Save Costs
- Reduce Load on IT
- Customize Environments
- Advanced Cloud Security Features – SOC 2 Type II Certified
- Complete Control & License Ownership
- Orasi Support & Expertise
