

# Application Performance Monitoring: Dynatrace Health Check

## Get More Value from your Dynatrace APM Investment

Dynatrace is the perfect solution for your APM needs. You are able to monitor, optimize and scale applications, both on premise and in the cloud to meet your business demands and support SLAs...or are you? While Dynatrace may be meeting your basic application performance monitoring needs, are you really getting the most out of your implementation?

Could you be using Dynatrace more effectively? Are you taking full advantage of the breadth of functionality that Dynatrace offers? If not, you may be missing a game-changing opportunity to make an impact within your organization, just by leveraging a tool you already own.

## Support Cloud Migration, Drive Adoption and Achieve Better Results

Orasi can help you decrease the total cost of ownership (TCO) of your Dynatrace APM investment through an essential Dynatrace Health Check. Our experienced and certified Dynatrace consultants analyze your existing implementation and provide a thorough assessment with detailed recommendations on easy-to-implement features and functionality that align with your overall business objectives to increase the value of your Dynatrace software.

We help you maximize your Dynatrace investment by providing a comprehensive overview and plan that will support cloud migration, drive user adoption, discover opportunities to increase efficiencies and potentially reduce costs and production issues.

## Do you need to address any of the following in your organization?

- Implement Monitoring on QA
- Implement Monitoring in Development
- Master Real User Monitoring
- Connect Application Metrics to Revenue Metrics
- Gain End-to-End Observability into all Application Components
- Identify Tools Causing Resource Constraints
- And many more use cases to gain insight

## Orasi APM Insight – Dynatrace Health Check

Orasi's extensive Dynatrace Health Check empowers you to quickly get more value from a top solution recognized for unrivalled monitoring of clouds, containers and microservices. We bring an objective view to help uncover opportunities and provide answers to key software investment questions before you get asked.

### + Current State

- How has the tool been rolled out?
- Is it living up to the expectations?
- Are you getting the value for the intended use case(s)?
- Is your application environment running smoothly?

### + Future State

- Are there additional use cases that need to be addressed?
- Where else can we apply the tool?
- Do you have a roadmap to drive adoption?

### + Identifying Gaps

- Do you have visibility or data gaps in your current implementation?
- Do you have clear insight into areas that need to be addressed?
- Are there processes that need to be course corrected?

### + Roadmap to Success

- Do you have a tailored plan on how to get to your desired future state?
- Have you identified additional use cases to drive value?
- Do you know how to leverage Dynatrace to support DTX, Cloud Migration, or other strategic initiatives?

## The Orasi Difference

Orasi is a DevSecOps innovator enabling the acceleration, delivery, and adoption of software applications and cloud infrastructure through automation. Orasi's services and solutions offer full lifecycle support and integration to ensure quality, security, and scalability of transformative applications.

## The Power of Dynatrace

Dynatrace offers a robust and diverse application performance experience that is unparalleled by nearly every other provider on the market.
