

Orasi Global Software Testing Services

Due to budget constraints, companies of all sizes are looking to reduce costs and search for low-cost alternatives to their software development initiatives. Many of these organizations are choosing to outsource these services. Beyond reducing costs, companies have also turned to outsourcing to:

- Address the need for specific skills and expertise
- Accelerate schedules and time to market
- Increase quality due to lack of standards, processes, repeatability, and maintainability

Orasi Understands That No Single Outsourcing Model is Right for Every Company

Some companies need personnel on-site, some need a larger staff but don't have facilities to house them, and still others are most concerned with cost. Orasi provides a global software testing services model that includes:

- In-house consultants
- Onshore software test engineers
- Offshore software test engineers

In-house:

Orasi's in-house consultants are responsible for project success and are the liaison to the customer's leadership team, managing deliverables with extensive software quality expertise.

Onshore Testing Centers:

Orasi's onshore testing centers offer skilled QA consultants throughout the U.S. These facilities counter the costs, risks, and lack of quality associated with exclusively using offshore or nearshore outsourcing services and are technology

Why Orasi?

Orasi has a long history helping clients propel their software initiatives. Orasi's comprehensive expertise in consulting services empowers your organization to achieve superior testing, faster time-to-market, and improved customer satisfaction. We help you optimize your testing process, mitigate risks, and deliver robust applications. Experience the power of Orasi's performance testing best practices assessment and mentoring and gain a competitive edge in today's fast-paced digital landscape.

agnostic. Our testers offer both manual and automated testing and are capable of creating test plans, developing and executing test cases, and creating automation test architectures.

Offshore:

Orasi's offshore team consists of a select group of offshore testing engineers who are dedicated to Orasi testing projects and customer success. They are highly skilled, motivated, and committed to meeting the needs of our clients. Our offshore personnel go through rigorous training and mentoring to ensure that all work is performed with the utmost precision and quality.

Quality Metrics:

To ensure the quality of the applications under test, testing metrics must be established and tracked for test planning, test execution, and defect detection. The Orasi team provides a recommended set of testing metrics based on our extensive testing background and experience.

Quality People:

Having a staff of competent and experienced manual and automation test engineers is essential to ensuring the quality of the applications under test and meeting project deadlines and cost constraints. The Orasi difference includes teams that are QA competent, certified and experienced, agile, flexible, and accessible, and are highly skilled.

Orasi Understands Your Organization's Testing Needs and Offers Clients:

- **Increased Quality:**

Orasi is a company you can trust to give you unbiased testing results. We align our testing process and methods with each customer's business needs and objectives to ensure delivery of a quality product. Our testing framework is designed from the start for reuse and minimizing maintenance of test cases and test scripts.

- **Reduced Costs:**

Orasi understands the needs of our customers to make cost effective decisions. We give our customers the greatest amount of flexibility when it comes to investing in an outsourcing initiative, offering a number of financing and pricing options that includes project-based, subscription, turn-key, and on-site rates. More importantly, we ensure that we provide the right number of people with the right skills at the right time to minimize costs.

- **Risk Mitigation:**

As with any outsourcing initiative, there are risks. Orasi works with customers to reduce risk whenever possible by earning the right to be a trusted advisor. Our experience with both successful and failed implementations has taught us the importance of performance responsibility and reliability, as well as maintaining the project schedule to ensure that each project is delivered on time and within budget.

The Orasi Difference

Orasi is a DevSecOps innovator enabling the acceleration, delivery, and adoption of software applications and cloud infrastructure through automation. Orasi's services and solutions offer full lifecycle support and integration to ensure quality, security, and scalability of transformative applications.
